ReadMe

In this game, you need to help Mr. Bee find the way back home in the dark using your mouse. You need to avoid those spiders' nets and arrive home in 60 seconds. If you touch the nets or you fail guiding Mr. Bee back home, you lose.

Future Work

I will add some Food into this game so that players can get extra points; also, I will add an alarm to inform the players the distances to the nets; from the suggestions I got today in class, I think the firefly one which shows where the spiders are is quite good and I will consider about that. To make spiders or enemies move is another good idea which I will consider about too.
